

Node.Js Exercise 01

1. Create a custom module which returns the sum and average of any two numbers passed into it. Require the module and run the server by passing 123 and 321 so that the server prints out the sum and average.

```
exports.sum = function (a,b) {  
  return (a+b);  
};
```

```
exports.avg = function (a,b) {  
  return ((a+b)/2);  
};
```

```
var sum = require('./sum')  
var a=15, b=15;  
console.log("Sum of the number is : " + sum.sum(a,b));  
console.log("Average of number is : " + sum.avg(a,b));
```

Project

nodejs

- Q1.js
- sum.js

Q1.js

sum.js

```
1 var sum = require('./sum')
2 var a=15, b=15;
3 console.log("Sum of the number is : " + sum.sum(a,b));
4 console.log("Average of number is : " + sum.avg(a,b));
5 |
```

Project

Q1.js

sum.js

nodejs

- Q1.js
- sum.js

```
1 exports.sum = function (a,b) {  
2   return (a+b);  
3 };  
4  
5 exports.avg = function (a,b) {  
6   return ((a+b)/2);  
7 };  
8
```

nithilan@nithilan-Aspire-E5-411: ~/Desktop/nodejs

nithilan@nithilan-Aspire-E5-411:~/Desktop/nodejs\$ node Q1.js

Sum of the numbers is : 30

Average of numbers is : 15

nithilan@nithilan-Aspire-E5-411:~/Desktop/nodejs\$ node Q1.js

Sum of the number is : 30

Average of number is : 15

nithilan@nithilan-Aspire-E5-411:~/Desktop/nodejs\$ node Q2.js

2 Create a simple http server and print “Welcome to Uki. I am **yourname**” when a request is sent to your server via the port 8000. (Note - Change different port numbers and check)

```
var http = require('http');

http.createServer(function (req, res) {

  res.writeHead(200, {'Content-Type': 'text/html'});

  res.end("Welcome to Uki. I am Nithilan");

}).listen(8000);
```

Project

nodejs

Q1.js

Q2.js

sum.js

Q1.js

sum.js

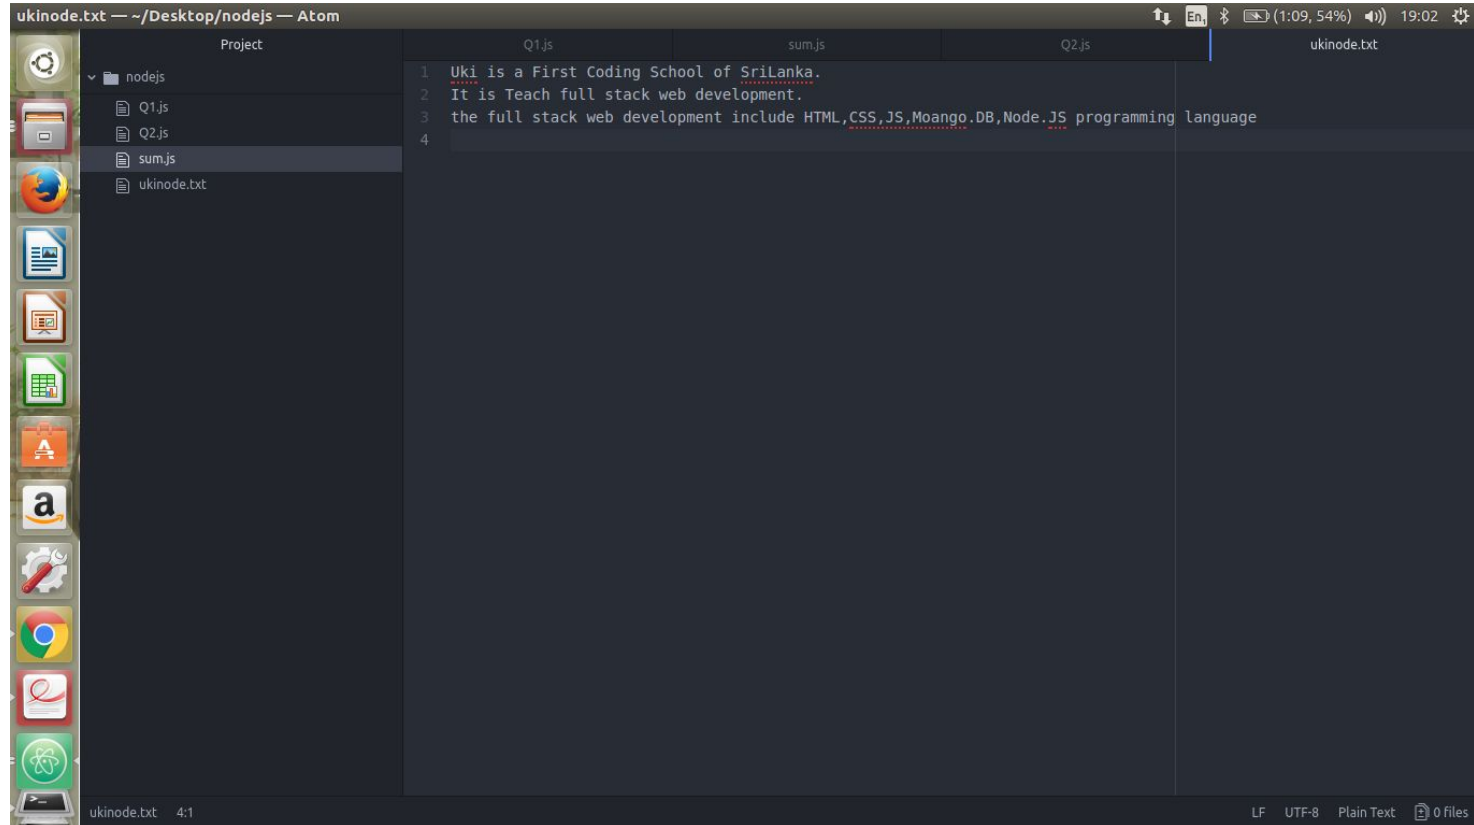

Q2.js

```
1 var http = require('http');
2
3 http.createServer(function (req, res) {
4   res.writeHead(200, {'Content-Type': 'text/html'});
5   res.end("Welcome to Uki. I am Nithilan");
6 }).listen(8000);
7
```

3 Using the file system module create a new file called ukinode.txt

3.1 Write a paragraph about Uki into that file

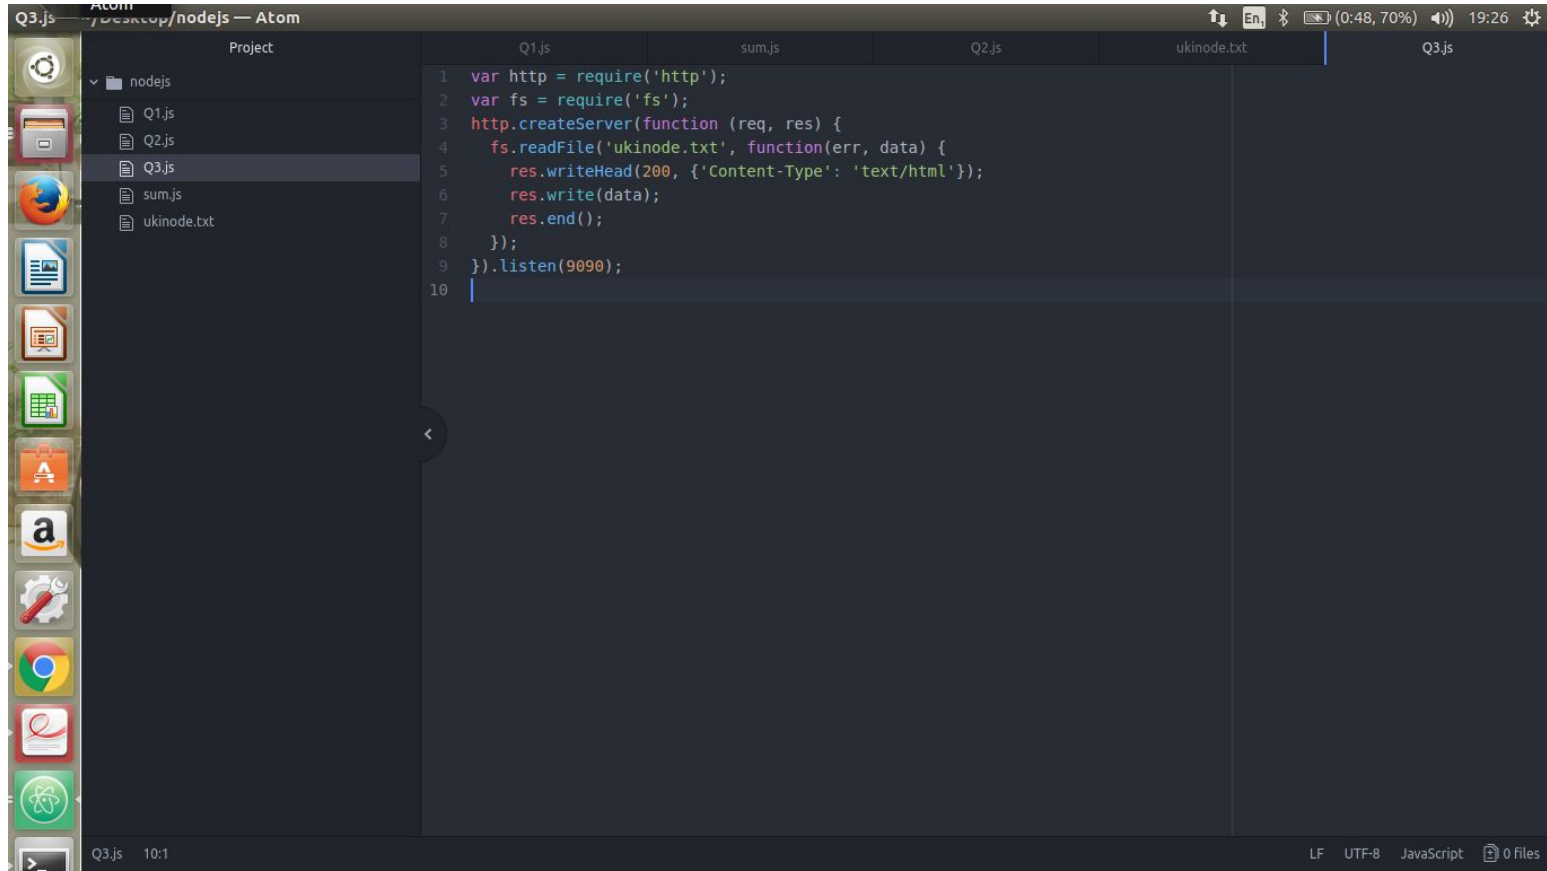

The screenshot shows the Atom text editor interface. The title bar indicates the file is 'ukinode.txt' located at '~/Desktop/nodejs' in the 'Atom' application. The left sidebar shows a project view with a folder named 'nodejs' containing files 'Q1.js', 'Q2.js', 'sum.js', and 'ukinode.txt'. The main editor area displays the content of 'ukinode.txt' with the following text:

```
1 Uki is a First Coding School of SriLanka.  
2 It is Teach full stack web development.  
3 the full stack web development include HTML,CSS,JS,Moango.DB,Node.JS programming language  
4
```

The status bar at the bottom shows 'ukinode.txt 4:1' on the left and 'LF UTF-8 Plain Text 0 files' on the right.

3.2 Serve that file to the client (Read File) over your server

The screenshot shows the Atom text editor interface. The left sidebar displays a project tree for a directory named 'nodejs', containing files 'Q1.js', 'Q2.js', 'Q3.js' (selected), 'sum.js', and 'ukinode.txt'. The main editor area shows the code for 'Q3.js'.

```
1  var http = require('http');
2  var fs = require('fs');
3  http.createServer(function (req, res) {
4    fs.readFile('ukinode.txt', function(err, data) {
5      res.writeHead(200, {'Content-Type': 'text/html'});
6      res.write(data);
7      res.end();
8    });
9  }).listen(9090);
10
```

The status bar at the bottom indicates the current file is 'Q3.js' at line 10, column 1, using LF line endings, UTF-8 encoding, and the JavaScript language mode. It also shows 0 files are open in the background.

Uki is a First Coding School of SriLanka. It is Teach full stack web development. the full stack web development include HTML,CSS,JS,Moango.DB,Node.JS programming language

1	Uki is best place of learing full stack web development. and we study Uki6 batch.it help to our bright future!							

3.5 Delete the file you created

8. Using the Nodemailer module create a server and send a mail to info@uki.life with the subject : “Testing my nodemailer module” , text: “This is easy !”

8.1 Now instead of text send a basic html formatted mail.

```
1 var nodemailer = require('nodemailer');
2
3 var transporter = nodemailer.createTransport({
4   service: 'gmail',
5   auth: {
6     user: 'pullinkouki6@gmail.com',
7     pass: 'ukipullie'
8   }
9 });
10
11 var mailOptions = {
12   from: 'pullinkouki6@gmail.com',
13   to: 'info@uki.life',
14   subject: 'Sending Email using Node.js',
15   text: 'That was easy!'
16 };
17
18 transporter.sendMail(mailOptions, function(error, info){
19   if (error) {
20     console.log(error);
21   } else {
22     console.log('Email sent: ' + info.response);
23   }
24 });
25
```
